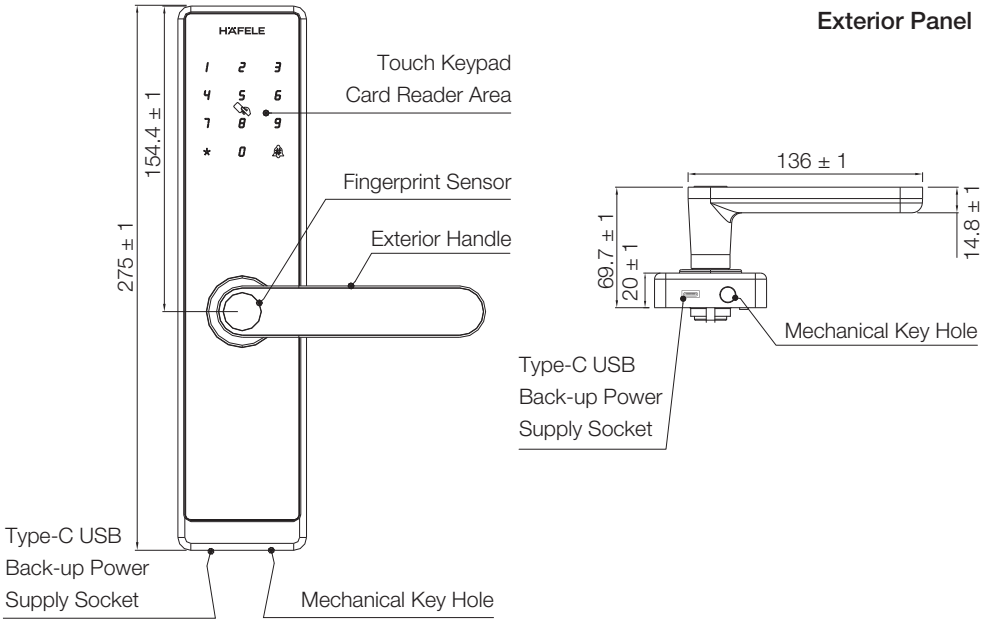
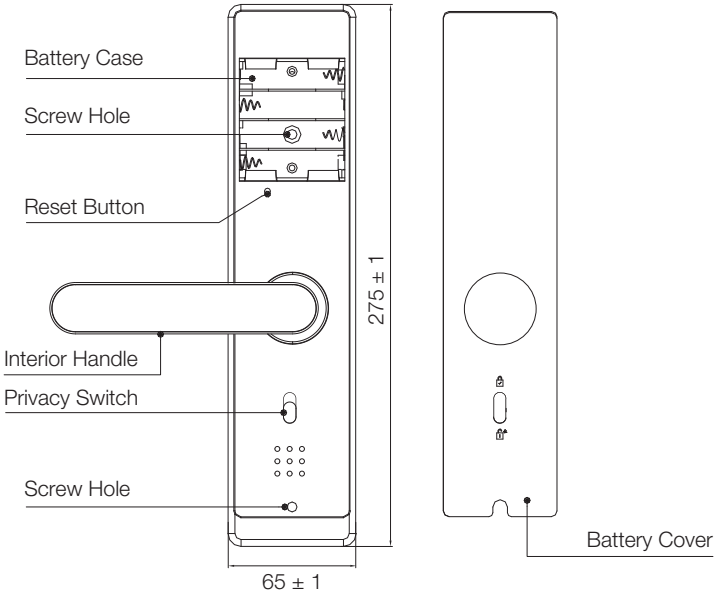
### Exterior Panel

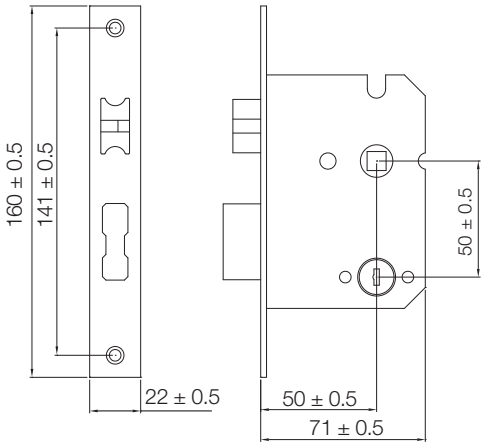


### Interior Panel

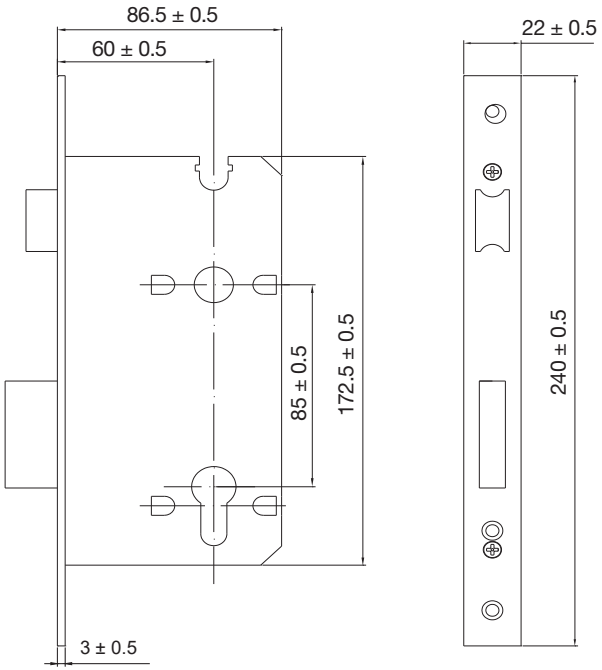


## Product Specification

**Small mortise lock AP5050**



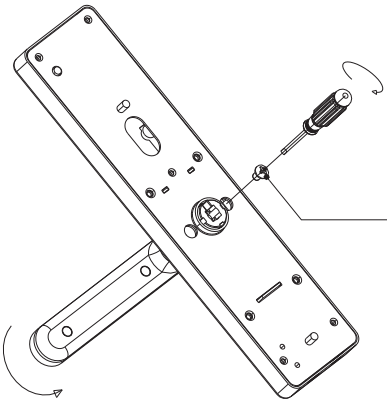
**Big mortise lock AP6085**



## Reverse exterior lever handle

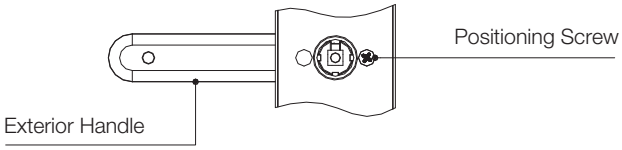
CAUTION

Make sure the lock is locked before reversing the lever handle. If you are not sure whether it is locked, please confirm by power on the lock and unlock once. After hearing the clutch is restored to the normally closed state, cut off of power by unloading the batteries and pull out the mechanical key.



1. Loosen positioning screw
2. Turn the handle 180° from downside to reverse the handle.
3. Fix it by positioning screw according to below diagram.

**For right-hand open**



**For left-hand open**
