RETAIL

Enjoy a set of two sustainable, reusable paper towels made of raw and renewable materials. Our super-absorbent, compostable towels last between 3- 6 months and can replace up to 15 rolls of ordinary paper towels. For best use, spray Hugh & Grace Multi-Purpose Cleaner on spills, appliances, surfaces, glass and wipe clean. Enjoy!

KEY BENEFITS:

- **Naturally antibacterial:** Bacteria thrives in damp environments, so unlike sponges, dish towels or wash cloths that tend to hold onto moisture & stay damp, our unique material blend dries so quickly, it inhibits that bacteria growth.
- **Quick drying:** Dries quickly without any mildew smell like a traditional plastic sponge.
- **Super absorbent:** 20x more absorbent than a paper towel, can last between 3- 6 months and can replace up to 15 rolls of ordinary paper towels.
- **100% compostable:** Made of only raw and renewable resources. Compost when it is taking longer to fully soften under water, or it doesn't absorb as much as quickly.

MATERIALS:

70% cellulose and 30% cotton—both of which are raw and renewable resources. This makes them 100% compostable, so they don't go to the landfill like traditional plastic sponges.

SUGGESTED USE:

Wet with water: Your towel will soften once you wet it.

To clean: Spray Hugh & Grace Cleaner anywhere messy and wipe to clean. 20x the absorbency of a regular paper towel, our reusable towel quickly and thoroughly cleans up spills and dirt.

Rinse and dry: Simply rinse with water or place on the top rack of the dishwasher for a deep clean. Squeeze dry.

PERFECT PAIRS

MULTI-PURPOSE CLEANER CONCENTRATE

Use with the multi-purpose cleaner or deep cleaner on everything from kitchen counters to bathroom vanities.
