Product features

Four way solution

Four electronic locking modes: master PIN code/user PIN code, key card, APP and fingerprint (Only ER5100).

Master PIN code/ User PIN code/ Key card/ and Fingerprint identification

1 master PIN code, up to 10 user PIN codes, 1 temporary user PIN code, 100 key cards, 100 fingerprints (Only ER5100).

1 2 3 4 6

Random security coding function

The random number can be added before or after the real user PIN code but the maximum length is 32 digits. This feature will prevent the real user PIN code from being exposed.

Auto lock / Auto re-lock function

When the door is closed, the lock will lock automatically (In case of auto locking mode).

Privacy function (Double lock function)

When the double lock function is activated the door cannot be opened from outside with user PIN code, key card or fingerprint except with master PIN code.

Defense mode

If someone exit from inside, the lock will alarm.

Burglary alarm function

When the door is opened by force, the lock is suspended with alarm.

Prevent mischief and hacking

When entering 5 times a wrong user PIN code/fingerprint and card in 5 minutes, the lock is suspended 100 seconds. After that the lock will activate again. While the lock is suspended, the screen will flash when you are trying to use keypad.

Alarm for battery replacement time

When the power of battery is too low a warning signal will appear on the screen. Please replace all batteries immediately.

Read before using

Warnings

- * Read and understand all instructions before use.
- * If damage is caused by failure to follow this instructions, the warranty does not apply.
- * Only use the alkaline batteries.
- * Do not expose the product and accessories to rain or water.
- * Do not expose the product to corrosive substances to avoid damage to the protective cover.
- * Do not scrape the fingerprint sensor with any sharp objects, otherwise it may cause permanent damage.
- * When cleaning the product, please wipe with a soft cloth.
- * If there is a low battery alert, please replace all the batteries in time and make sure they are properly installed.

Product specifications

External module

Internal module

Micro USB emergency power supply

(A CAUTION

- 1. You can follow the voice guide by multi-language (English/Spanish/Portuguese/Russian/Chinese).
- 2. Master PIN code(6~12 digits): Default master PIN code is "12345678", please modify it after installation.
- 3. User PIN code(6~12 digits): Maximum capacity is 10 with user number [00-09].
- 4. Temporary user PIN code(6-12 digits): Maximum capacity is 1, this PIN can only be used for one time unlocking.
- 5. Fingerprint: Maximum capacity is 100 with user number [00-99] (Only ER5100).
- 6. Card: Maximum capacity is 100 with user number [00-99].

Read before using

Factory default settings

Settings	Factory defaults
Master PIN code*	12345678
Auto locking	Enabled
Speaker	Enabled
Wrong code entry limit	5 times
Shutdown time	100 seconds
Voice guide language	English
Bluetooth	Disabled

^{*}Important: First step is to set your own master PIN code.

Quick setup guide

Master PIN code

Input number (00~09)

Enter fingerprint (Only ER5100)

Star key, return to previous menu

User PIN code

Input number (00~99)

Enter card

Touch the screen to activate lock

Add/Change access data

How to change master PIN code

A CAUTION

Before changing default master PIN code, all other setting menu will be disabled. You have to change master PIN code first, then do other lock settings.

How to add user PIN codes

(A CAUTION

- 1. When registering user PIN codes, the code must be entered within 15 seconds.
- 2. At any time you can return to the previous menu by pressing the "*" key.

How to add temporary user PIN codes (One time password)

⚠ CAUTION

- 1. When registering temporary user PIN codes, the code must be entered within 15 seconds.
- 2. At any time you can return to the previous menu by pressing the "*" key.
